To whom it may concern,

Letter of Recommendation:

It is without hesitation that I am able to confidently recommend Building Products WA to any potential clientele for the supply of building equipment and supplies.

Building Products WA have been involved in several projects within Ausco Modular's construction and manufacturing divisions supplying building and construction materials over the previous 20 years.

Ausco Modular's core business function is to supply quality turnkey developments across all sectors including large scale mining, tourism and accommodation, education, large scale residential developments through to quality bespoke homes for the private sector.

Building Products WA was appointed to Ausco Modular's preferred supplier list and this is a credit to Building Products WA director Ross Davies and his qualified team.

The service that we have been provided by Ross Davies and his company is second to none, and with the professionalism, attention to detail, timeliness in ensuring that all requests are completed in full and on time and the open approach and "can do attitude" of the entire team are a very rare quality within the building service industry of today.

Building Products WA have been directly involved with Ausco in the successful delivery of projects such as the Dale Christian School in Armadale, Blue Gum Montessori School, Saint Marks Anglican School and countless residential, education, mining and resource developments across the Perth Metropolitan and remote W/A regions.

It is with great confidence that we are looking to the future with Building Products WA to continue the impeccable service that we have received to date.

Please don't hesitate to contact myself on the below details should you require further information and I look forward to the opportunity to discuss how Building Products WA are able to become an integral part in the success of your next project.

Regards,
Ausco Modular
